

Confluence, noun
 con·flu·ence | \ ˈkän- flü-ən(t)s

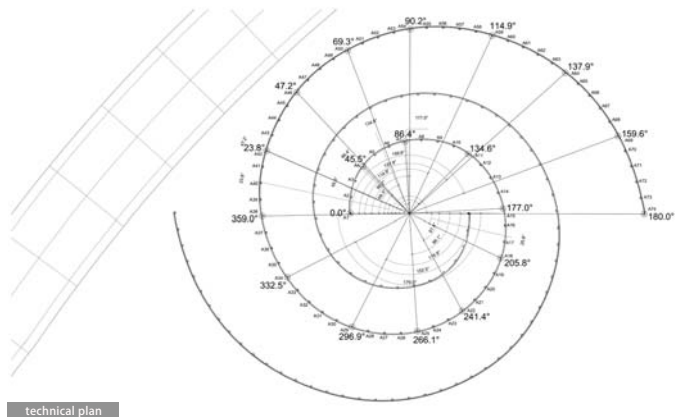

1. the junction of two rivers, especially rivers of approximately equal width; an act or process of merging
2. a coming or flowing together, meeting, or gathering at one point

Cornerstone Architecture Inc. is proud to offer 'The Confluence'; a temporary architectural installation with the goal to **combat urban loneliness through connection and belonging**. The Confluence is a place for coming together. Located at a confluence of Deshkan Ziibi (Thames River), we offer a one day pop-up installation that is for **all of us**. As we come together as a community, we merge our stories, our history, and our dreams for the future. We celebrate our commonalities and our differences. We build new relationships and deepen those we already have.

Throughout the day, the installation will be activated by other Londoners as they use the space to engage community with their own City of Neighbours activity. Whether through a guided meditation, a breathwork exercise, or a poetry reading, we will experience many different avenues of community, connection and mindfulness at the Confluence.

SCHEDULE

TIME	ACTIVATION	FACILITATOR
